

Stolní odmagnetovávka DM

Table demagnetizers have a wide range of uses. Our new production line is focused on working economy. This new line can automatically adapt the height of the magnetic field according to needs and the component size. This brings with it, the advantage of lower working costs. The principle of its activity is in the creation of a demagnetizing field which adapts itself to the residual magnetism and the size and shape of the component. The double coil with an unlimited working cycle guarantees high quality of demagnetization and a long life.

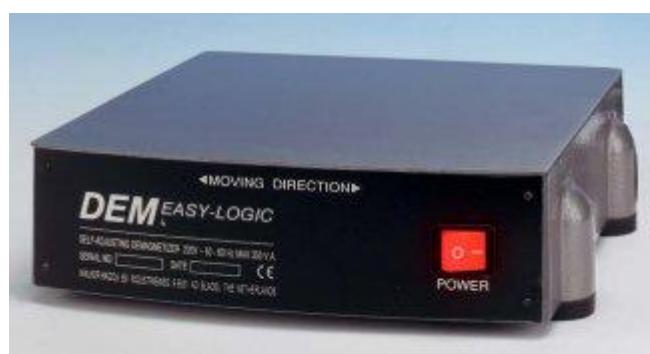

The innovated type DEM-4 EASY LOGIC with a demagnetizing field of up to 40 mm above the working surface guarantees the quick demagnetization of even, massive components.

Construction:

- Automatic regulation of operation
- Economic working
- High demagnetizing field
- Unlimited working cycle

Usage:

- Demagnetization of tools, components and workpieces

Code	Type	Dimensions (mm)			Voltage (V)	Input (W)	Weight (kg)
		L	S	H			
51.57.351	DM 3	250	180	87	220	352	8,8
51.57.355	DM 4	280	266	87	220	352	14
51.57.356	DM 5	400	306	87	220	352	19
51.57.358	DEM-4 Easy Logic	280	280	86	220	352	15
